

206EL

6,500 Ft.-Lb. Moment Rating and 2000 Lb. Max Capacity

- Power boom elevation is incorporated into this compact design allowing the operator to manipulate the load radius with a suspended load.
- Standard boom length 5.5 ft. with a manual pull out to 9 ft. with an intermediate position at 7 ft.
- Planetary gear driven winch is standard for the best possible efficiency
- Unlimited manual rotation on tapered roller bearings for easy movement.
- A band brake is included to control boom swing.
- 35' of 3/16" Galvanized Aircraft Cable with 4200 lb breaking strength.
- Pedestal Heights can be varied for many custom applications.
