

Maxon

Sidelift Series

GPSR

GPSLR

Maxon's GPSLR provides both the reliability and features you need to ensure fault-free, risk-free Slidelift operation on all your trailers with capacity up to 4,400 lbs. With optional SmartStow[®] technology, using the gate is virtually a one-button job.

Level Ride; Accomodates both Roll-Up and Swing Doors

Maxon's GPSLR Slidelift series provides the level ride you need for precarious cargo, combined with horizontal stowage. The result is a gate that works with both roll-up and swing-style trailer doors.

Optional SmartStow[®] Technology

Press one button and SmartStow[®] makes everything else automatic: detecting the correct height, stowing securely, and locking in place. Combined with a hydraulic locking system which locks the gate securely during transit, the GPSLR is the most full-featured, intelligent Slidelift on the market.

Sidelift Series

GPS

GPS

The GPS Sidelift delivers high capacity (to 5,500 lbs) in a lightweight design with smart features to enhance ease of use.

Accommodates both Roll-Up and Swing Doors

Maxon's GPS Sidelift series provides the smooth performance you need for precarious cargo, combined with horizontal stowage. The result is a gate that works with both roll-up doors and swing-style doors.

Smart Features for Ease of Use

The GPS's design helps enhance ease of use. A standard handheld remote and dual cart stops with auto leveling and foot controls make the liftgate easy to operate, while an automatic "Quicklock" stabilizes the gate during lifting

Key Features

- Lightweight Sidelift model with standard aluminum platform
- Stores underneath rear of trailer
- Automatic "Quicklock"
- Standard hand held remote and dual cart stops
- Auto leveling and foot controls
- Ships completely assembled

GPST

GPST

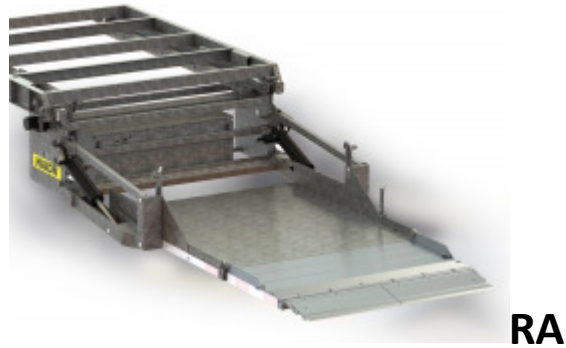

The GPST is MAXON's latest addition to its Slider product range. This slider is explicitly designed for trucks and excels in performance as well as compact dimensions

Key Features

- The GPST features the unique X1 technology which utilizes only one lift and one tilt cylinder, resulting in less parts (e.g. less hoses, valves, etc.) and consequently less maintenance costs
- The GPST utilizes two opposing cylinders to slide in and out resulting in a smooth and reliable deployment
- The GPST features a unique Quick Lock mechanism. The Quick Lock carries the load (not the rollers) and avoids platform bouncing when moving load from the truck to the platform
- The GPST flip over section is torsion spring assisted for effortless opening and closing
- The GPST features 2-speed cylinders that slow the platform when it touches the ground and tilts down automatically

Sidelift Series

RA

MAXON's new Trailer Side Door Gate is purpose designed, made to last and supported by the best pre- and after sales service organization in the industry

Key Features

- The RA side door Slidelift series comes in 3,500 lbs and 4,500 lbs capacities
- It features 3 platform widths: 48", 60", and 82" and two depths: 55" and 79"
- Two hydraulic lifting cylinders with bi-directional lock valves
- The RA comes completely assembled and prefilled with hydraulic oil
- Wide arm design for stability and maximum side rail clearance capabilities
- Greaseable pins and bushings on all pivot points
